# Model COVID-19 Prevention Procedures (CPP)

In California, all employers are required to establish, implement, and maintain an effective, written Injury and Illness Prevention (IIPP) program that meets the requirements of California Code of Regulations (CCR), Title 8, section 3203. COVID-19 is considered a workplace hazard and most employers must address COVID-19 prevention under their workplace IIPP. COVID-19 prevention procedures must be addressed either in the written IIPP or maintained in a separate document.

Cal/OSHA has developed this model COVID-19 CPP to assist employers that choose to address their written COVID-19 hazard control procedures in a document separate from their IIPP. Employers are not required to use this CPP. Instead, they may create their own or use another CPP template. Cal/OSHA encourages employers to engage with employees in the design, implementation, and evolution of their CPP.

Using this model alone does not ensure compliance with the Cal/OSHA COVID-19 Prevention standard. To use this model CPP effectively, and ensure it meets the COVID-19 standard requirements, the person(s) responsible for implementing the CPP should carefully review:

- Elements that may be required in the following CCR, Title 8 sections:
  - o 3205, COVID-19 Prevention
  - o 3205.1, COVID-19 Outbreaks
  - o 3205.2, COVID-19 Prevention in Employer-Provided Housing
  - o 3205.3, COVID-19 Prevention in Employer-Provided Transportation
  - The three Additional Considerations provided at the end of this CPP to see if they are applicable to their workplace.
- Additional guidance and resources are available at www.dir.ca.gov/dosh/coronavirus/

CCR, Title 8 sections 3205 through 3205.3 apply until two years after February 3, 2023, except for the recordkeeping subsections 3205(j)(2) through (3), which apply until three years after February 3, 2023.

# COVID-19 Prevention Procedures (CPP) for Blazona Concrete Construction Inc.

This CPP is designed to control employees' exposures to the SARS-CoV-2 virus (severe acute respiratory syndrome coronavirus 2) that causes COVID-19 (Coronavirus Disease 2019) that may occur in our workplace.

Date: February 02, 2023

## Authority and Responsibility

Blazona Concrete Constructions Safety Manager and Management has overall authority and responsibility for implementing the provisions of this CPP in our workplace. In addition, all managers and supervisors are responsible for implementing and maintaining the CPP in their assigned work areas and for ensuring employees receive answers to questions about the procedures in a language they understand.

All employees are responsible for using safe work practices, following all directives, policies and procedures, and assisting in maintaining a safe work environment.

# Application of the Blazona Concrete Construction Inc. Injury & Illness Prevention Program (IIPP)

COVID-19 is a recognized hazard in our workplace that is addressed through our IIPP, which will be effectively implemented and maintained to ensure the following:

- 1. When determining measures to prevent COVID-19 transmission and identifying and correcting COVID-19 hazards in our workplace:
  - a. All persons in our workplace are treated as potentially infectious, regardless of symptoms, vaccination status, or negative COVID-19 test results.
  - b. COVID-19 is treated as an airborne infectious disease. Applicable State of California and local County Health Department orders and guidance will be reviewed when determining measures to prevent transmission and identifying and correcting COVID-19 hazards. COVID-19 prevention controls include:
    - i. Remote work.
    - ii. Physical distancing.
    - iii. Reducing population density indoors.
    - iv. Moving indoor tasks outside.
    - v. Implementing separate shifts and/or break times.
    - vi. Restricting access to work areas.
    - vii. Providing PPE i.e., gloves, masks
- 2. Training and instruction on COVID-19 prevention is provided:
  - a. When this CPP was first established.
  - b. To new employees.
  - c. To employees given a new job assignment involving COVID-19 hazards and they have not been previously trained.
  - d. Whenever new COVID-19 hazards are introduced.
  - e. When we are made aware of new or previously unrecognized COVID-19 hazards.
  - f. For supervisors to familiarize themselves with the COVID-19 hazards to which employees under their immediate direction and control may be exposed.

Appendix A COVID-19 Training Roster will be used to document this training.

- 3. Procedures to investigate COVID-19 illnesses at the workplace include:
  - a. Determining the day and time a COVID-19 case was last present; the date of the positive COVID-19 tests or diagnosis; and the date the COVID-10 case first had one or more COVID-19 symptoms. Appendix B Investigating COVID-19 Cases will be used to document this information.
    - b. Encouraging employees to report COVID-19 symptoms and to stay home when ill. We encourage our employees to call their immediate supervisor at the beginning of each day to notify them without repercussion
    - c. Identify and respond to persons with COVID-19 symptoms at the workplace. Blazona Concrete Construction Supervisors are trained to ask when the employee started feeling these symptoms and if they we're in contact with any other employees at the time of feeling these symptoms.
- 4. Effective procedures for responding to COVID-19 cases at the workplace include:
  - a. Immediately excluding COVID-19 cases according to the following requirements:
    - i. COVID-19 cases who do not develop COVID-19 symptoms will not return to work during the infectious period.
    - ii. COVID-19 cases who develop COVID-19 symptoms will not return to work during the shorter of either of the following:
      - a. The infectious period.
      - b. Through 10 days after the onset of symptoms and at least 24 hours have passed since a fever of 100.4 degrees Fahrenheit or higher has resolved without the use of fever-reducing medication.
  - iii. Regardless of vaccination status, previous infection, or lack of COVID-19 symptoms, a COVID-19 case must wear a face covering in the workplace until 10 days have passed since the date that COVID-19 symptoms began or, if the person did not have COVID-19 symptoms, from the date of their first positive COVID-19 test.
  - iv. Elements i. and ii. apply regardless of whether an employee has been previously excluded or other precautions were taken in response to an employee's close contact or membership in an exposed group.
  - b. Reviewing current **California Department of Public Health (CDPH)** guidance for persons who had close contacts, including any guidance regarding quarantine or other measures to reduce transmission.
  - c. If an order to isolate, quarantine, or exclude an employee is issued by a local or state health official, the employee will not return to work until the period of isolation or quarantine is completed or the order is lifted.
  - d. Upon excluding an employee from the workplace based on COVID-19 or a close contact, Blazona Concrete Construction will provide excluded employees information regarding COVID-19-related benefits to which the employee may be entitled under applicable federal, state, or local laws. This includes any benefits available under legally mandated sick leave, workers' compensation law, local governmental requirements, and Blazona Concrete Construction leave policies and leave guaranteed by contract. This process will be handled by our Human Resource department.

# **Testing of Close Contacts**

COVID-19 tests are available at no cost, during paid time, to all of our employees who had a close contact in the workplace. These employees will be provided with the information outlined in paragraph (4)(f), above.

Exceptions are returned cases as defined in CCR, Title 8, section 3205(b)(11).

#### Notice of COVID-19 cases

Employees, customers, and trade partners who had a close contact will be notified as soon as possible, or at the time of being notified to Blazona Concrete Construction.

Blazona Concrete Construction Inc. will:

- Provide notice of a COVID-19 case, in a form readily understandable to employees. The notice will be given to all employees, employers, customers, and vendors at the worksite.
- Provide the notice to the authorized representative, if any of:
  - The COVID-19 case and of any employee who had a close contact.
  - All employees on the premises at the same worksite as the COVID-19 case within the infectious period.

Blazona Concrete Construction will notify its employees verbally, by phone, or email. To our customers and vendors an email will be sent out to the authorized representative notifying of the date and time close contact case.

# **Face Coverings**

Employees will be provided face coverings and required to wear them when required by a CDPH regulation or order. This includes spaces within vehicles when a CDPH regulation or order requires face coverings indoors. Face coverings will be clean, undamaged, and worn over the nose and mouth.

The following exceptions apply:

- 1. When an employee is alone in a room or vehicle.
- 2. While eating or drinking at the workplace, provided employees are at least six feet apart and, if indoors, the supply of outside or filtered air has been maximized to the extent feasible.
- 3. Employees who cannot wear face coverings due to a medical or mental health condition or disability, or who are hearing-impaired or communicating with a hearing- impaired person. Such employees shall wear a medically approved cover, such as a face shield with a drape on the bottom, if the condition or disability permits it.
- 4. During specific tasks which cannot feasibly be performed with a face covering. This exception is limited to the time period in which such tasks are actually being performed.

If an employee is not wearing a face covering due to exceptions (4) and (5), above, the COVID-19 hazards will be assessed, and action taken as necessary.

Employees will not be prevented from wearing a face covering, including a respirator, when not required by this section, unless it creates a safety hazard.

#### Ventilation

For our indoor workplaces we will:

- Review CDPH and Cal/OSHA guidance regarding ventilation, including the CDPH Interim Guidance for Ventilation, Filtration, and Air Quality in Indoor Environments. Blazona Concrete Construction Inc. will develop, implement, and maintain effective methods to prevent transmission of COVID-19, including one or more of the following actions to improve ventilation:
  - Maximize the supply of outside air to the extent feasible, except when the United States
     Environmental Protection Agency (EPA) Air Quality Index is greater than 100 for any pollutant or if
     opening windows or maximizing outdoor air by other means would cause a hazard to employees, for
     instance from excessive heat or cold.
  - Use High Efficiency Particulate Air (HEPA) filtration units in accordance with manufacturers' recommendations in indoor areas occupied by employees for extended periods, where ventilation is inadequate to reduce the risk of COVID-19 transmission.
- Determine if our workplace is subject to CCR, Title 8 section 5142 Mechanically Driven Heating, Ventilating and Air Conditioning (HVAC) Systems to Provide Minimum Building Ventilation, or section 5143 General Requirements of Mechanical Ventilation Systems, and comply as required.

In vehicles, we will maximize the supply of outside air to the extent feasible, except when doing so would cause a hazard to employees or expose them to inclement weather.

# Reporting and Recordkeeping

Appendix B <b>Investigating COVID-19 Cases</b> will be used to keep a record of and track all COVID-19 case These records will be kept by <b>Blazona Concrete Construction Inc.</b> and retained in the employee's file	S.

Adrian J. Vela Director of Safety

### Additional Consideration #1

#### COVID-19 Outbreaks

[This addendum will need to be added to your CPP if three or more employee COVID-19 cases within an exposed group visited the workplace during their infectious period at any time during a 14-day period, unless a CDPH regulation or order defines outbreak using a different number of COVID-19 cases and/or a different time period. Reference CCR, Title 8 section 3205.1 for details.]

This addendum will stay in effect until there are one or fewer new COVID-19 cases detected in the exposed group for a 14-day period.

#### **COVID-19 testing**

We immediately provide COVID-19 testing available at no cost to our employees within the exposed group, regardless of vaccination status, during employees' paid time, except for returned cases and employees who were not present at the workplace during the relevant 14-day period(s).

Additional testing is made available on a weekly basis to all employees in the exposed group who remain at the workplace.

Employees who had close contacts will have a negative COVID-19 test taken within three to five days after the close contact or will be excluded and follow our return-to-work requirements starting from the date of the last known close contact.

#### **Face Coverings**

Employees in the exposed group, regardless of vaccination status, will wear face coverings when indoors, or when outdoors and less than six feet from another person, unless one of the exceptions in our CPP applies.

#### Respirators

Employees will be notified of their right to request and receive a respirator for **voluntary** use.

#### COVID-19 investigation, review, and hazard correction

Blazona Concrete Construction Inc. will perform a review of potentially relevant COVID-19 policies, procedures, and controls, and implement changes as needed to prevent further spread of COVID-19 when this addendum initially applies and periodically thereafter. The investigation, review, and changes will be documented and include:

- Investigation of new or unabated COVID-19 hazards including:
  - Our leave policies and practices and whether employees are discouraged from remaining home when sick.
  - Our COVID-19 testing policies.
  - Insufficient supply of outdoor air to indoor workplaces.
  - o Insufficient air filtration.
  - Insufficient physical distancing.
- Review updated every 30 days that CCR, Title 8 section 3205.1 continues to apply:
  - o In response to new information or to new or previously unrecognized COVID-19 hazards.
  - When otherwise necessary.
- Any changes implemented to reduce the transmission of COVID-19 based on the investigation and review, which may include:
  - o Moving indoor tasks outdoors or having them performed remotely.

- Increasing the outdoor air supply when work is done indoors.
- o Improving air filtration.
- Increasing physical distancing to the extent feasible.
- o Requiring respiratory protection in compliance with CCR, Title 8 section 5144.
- Other applicable controls.

#### Ventilation

Buildings or structures with mechanical ventilation will have recirculated air filtered with Minimum Efficiency Reporting Value (MERV)-13 or higher efficiency filters, if compatible with the ventilation system. If MERV-13 or higher filters are not compatible with the ventilation system, filters with the highest compatible filtering efficiency will be used. High Efficiency Particulate Air (HEPA) air filtration units will be used in accordance with manufacturers' recommendations in indoor areas occupied by employees for extended periods, where ventilation is inadequate to reduce the risk of COVID-19 transmission.

These ventilation requirements will continue to be implemented after the outbreak has passed and CCR, Title 8 section 3205.1 is no longer applicable.

### **Major Outbreaks**

The following will be done while CCR, Title 8 section 3205.1 applies if 20 or more employee COVID-19 cases in an exposed group visited the worksite during their infectious period within a 30-day period:

- The COVID-19 testing will be required of all employees in the exposed group, regardless of vaccination status, twice a week or more frequently if recommended by local health department. Employees in the exposed group will be tested or excluded and follow our CPP return to work requirements. The twice a week testing requirement ends when there are fewer than three new COVID-19 cases in the exposed group for a 14-day period. We will then follow weekly testing requirement until there are one or fewer new COVID-19 cases in the exposed group for a 14-day period.
- Report the outbreak to Cal/OSHA.
- Provide respirators for voluntary use to employees in the exposed group, encourage their use, and train employees according to CCR, Title 8 section 5144(c)(2) requirements.
- Any employees in the exposed group who are not wearing respirators as required will be separated
  from other persons by at least six feet, except where it can be demonstrated that at least six feet of
  separation is not feasible, and except for momentary exposure while persons are in movement.
  Methods of physical distancing include:
  - o Telework or other remote work arrangements.
  - o Reducing the number of persons in an area at one time, including visitors.
  - Visual cues such as signs and floor markings to indicate where employees and others should be located or their direction and path of travel
  - Staggered arrival, departure, work, and break times.
  - Adjusted work processes or procedures, such as reducing production speed, to allow greater distance between employees.

When it is not feasible to maintain a distance of at least six feet, individuals will be as far apart as feasible.

## Additional Consideration #3

# **COVID-19 Prevention in Employer-Provided Transportation**

[This addendum will need to be added to your CPP if there is employer-provided motor vehicle transportation to and from work, during the course and scope of employment, which is provided, arranged for, or secured by an employer regardless of the travel distance or duration involved. Reference CCR, Title 8 section 3205.3(a) for details and exceptions.]

The requirements of our CPP will be complied with within a vehicle, including how a COVID-19 case will be responded to.

### **Assignment of transportation**

To the extent feasible:

- Transportation will be assigned such that cohorts travel and work together, separate from other workers.
- Employees who usually maintain a household together shall travel together.
